

Visit to NewYork

During a month's stay with Hanasoge Shravan (son) in his rented home near Central park (CP Manhattan, NewYork) in August 2012 during which period he was a post-doctoral fellow at Princeton and a visiting scientist at New York University, he ensured that his parents walked around and threw a challenge that they should complete 100 miles. It appears that they managed to meet the challenge. Here are the details of where all they walked around. Some of the places visited and the commentary on the places may be worth looking through.

Date	Day	Visit	Distance, miles

		Total miles walked in nyc between 12 August 2012 to 13 Sep 2012	100.6

Comments on some places visited

Place visited	Commentary
American museum of natural history	A really remarkable museum; the sections on evolution, biology, brain, origin of music, bird's learning skills, mineralogy, meteorites, earth and space are truly outstanding; The segment on how earth got water needs improvement. The section on energy should have new energy sources included. We visited this museum three times spending about three and half hours each day.
Metropolitan museum of arts	Another equally remarkable museum on arts from all the regions of the world. Buddhism, Hinduism, Egyptian and Chinese art attracted my attention. Very substantive stuff takes at least three visits to completely cover the museum
New York botanical garden	Here again it is huge and covers the garden that is extremely well documented and described. There are interesting research studies going on here.
Intrepid museum	Space shuttle used for initial trials, submarine, many aircraft of earlier and current vintage, Concorde
Himalayan arts	A variety of Buddhistic idols, pictures
